

There is finally an opportunity to have PacBell provide the service you'd expect from a utility (telephone company). I appreciate competition but not at my expense. To be forced to have multiple phone bills for multiple services is to meet either a corporations or political needs not the customers. An environment of competition can be accomplished through insisting competitors make the necessary investments just as I have as a small company. Make sure PacBell becomes part of the long distance business in California. That will be good for the customer.
